Reviews

Completely among the finest ebook We have at any time read through. it was actually writtern really properly and helpful. You are going to like just how the writer compose this publication.

(Mr. Deangelo Considine)

LUMBER MANUFACTURE IN THE DOUGLAS FIR REGION (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Lumber Manufacture in the Douglas Fir Region The purpose of this book is to present in convenient form data on the methods and costs of constructing and operating plants for the manufacture of lumber from Douglas fir in the region west of the Cascade Mountains in Oregon and Washington. Taken in connection with U.S. Department of Agriculture Bulletin No. 711, Logging in the Douglas Fir Region, by William H. Gibbons, similar data is available on both the logging and manufacturing branches of the fir lumbering industry. The information is intended primarily for National Forest timber appraisers and other National Forest officers, for lumbermen not familiar with the manufacture of Douglas fir and for students of forestry; particular efforts have been made also to include information of value to mill architects and machinery manufacturers, as well as to the lumbermen themselves. The geographic limitations mentioned above should be kept in mind because most of the conclusions and figures are not applicable to lumber manufacture in other regions nor for other species of wood. This is to be understood in all cases whether or not it is specified that the text applies only to conditions at fir mills. The particular information of costs and other specific data subject to fluctuations with time are all as of 1916 and are published now because earlier presentation was prevented by the War. It is realized, of course, that these notes are neither flawless nor altogether complete; but they are the best available even now and furnish a reliable basis for estimates of complete operations. The variety of conditions at the many different sizes and types of mills have rendered it...
