

## Co2 Emissions - Moving from an Environmental Issue to an Economic Variable and the Implications for the German Chemical Businesses

By Thalia Bruhin

GRIN Verlag. Paperback. Book Condition: New. Paperback. 136 pages. Dimensions: 8.3in. x 5.8in. x 0.3in. Masters Thesis from the year 2009 in the subject Business economics - Miscellaneous, grade: 1, University of Bradford, language: English, comment: A high quality piece of research of a topic which is both complex and highly intested. The material is brought together in an excellent analysis and assessment. Excellent presentation. The written text is very good, as is the quality of the various illustrations. Overall the entire document is a reflection of a quality project. This is one of the best MBA management projects that I have assessed. , abstract: Under the Kyoto Protocol, the European Union (EU) has introduced an Emissions Trading Scheme (ETS) in January 2005 in order to set economic limits to an environmental concern, global warming. This scheme covers industrial plants that can now trade allowances of carbon dioxide (CO2). This new carbon market is the largest of its sort, growing quickly and behaving very similarly to the stock markets. Because of being so new, there is still a considerable amount of uncertainty about its future development, but some first lessons are discussed in the report. Crucial is the allocation of allowances...
