Design of an Integrated Process Chain to Support the Manufacturing of Ti6Al4V Components

By Algebra Veronica Vargas Aparicio

Shaker Verlag Dez 2010, 2010. Taschenbuch. Book Condition: Neu. 208x146x20 mm. Neuware - Nowadays, the industry evolves towards the production of complex components with added value; most of them are made of materials with higher capabilities, such as the titanium alloys. Titanium alloys have attractive characteristics, e.g. high strength, low density and good corrosion resistance, which offer many potential applications. In the automotive industry, titanium alloys have been recently introduced with the aim of developing new vehicles with reduced weight, and thus optimized fuel consumption. In the aerospace industry, titanium alloys are currently the most used materials in aero engines, with a volume fraction of approximately 40%. On the one hand, the maturity in the aero engine design has been reached to a point where the manufacturers are focusing more on productivity, which implies the development of new technologies and processes, thus the development of new manufacturing strategies and new process chains. The introduction of materials with new capabilities represents challenges for the manufacturing technologies as these materials are difficult to machine. Their processes are defined and characterised only when knowledge and deep understanding about the material performance is available. And cost minimisation can take place when manufacturing knowledge is...

Reviews

This created pdf is fantastic. Indeed, it can be perform, nonetheless an interesting and amazing literature. Its been developed in an remarkably straightforward way and is particularly simply following i finished reading this publication by which in fact altered me, alter the way i really believe.

-- **Amanda Hand Jr.**

A must buy book if you need to adding benefit. Of course, it is actually perform, still an interesting and amazing literature. I am delighted to explain how this is basically the best book i actually have read through during my individual life and may be he best book for at any time.

-- **Jarod Bartoletti**
