CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. The U. S. Department of Agriculture (USDA) Strategic Plan for FY 2010-2015 targets the restoration of watershed and forest health as a core management objective of the national forests and grasslands. To achieve this goal, the Forest Service, an agency of USDA, is directed to restore degraded watersheds by strategically focusing investments in watershed improvement projects and conservation practices at the landscape and watershed scales. The Watershed Condition Framework (WCF) is a comprehensive approach for classifying watershed condition, proactively implementing integrated restoration in priority watersheds on national forests and grasslands, and tracking and monitoring outcome-based program accomplishments for performance accountability. In a 2006 review of the Forest Service Watershed Program, the Office of Management and Budget (OMB) concluded that the agency lacked a nationally consistent approach to prioritizing watersheds for improvement (OMB 2006). The OMB also noted that current Forest Service direction for tracking watershed condition class (FSM 2521) was vague, open to varied interpretation, and insufficient to consistently evaluate watershed condition or track how the condition changes over time. To address these issues, the Forest Service formed...

## Reviews

*Very beneficial for all type of folks. It can be rally intriguing throgh studying time. You will like how the writer publish this ebook.*
