Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It's been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, altered the way I believe.

(Prof. Loyce Runolfsson Jr.)

Paperback. Book Condition: New. Paperback. 84 pages. This book is an introduction to how people and governments create, use, and abuse money and credit. It focuses on the USA monetary system, including its history, where we are in late 2010, and how to fix our failing economic and monetary system. Broadly, a monetary system for a nation is used to provide and control the exchange of money. It includes the currency (physical coins and paper, or their electronic form), mints, various types of private (not government owned) banks, and usually a central bank which manages the system and stores the nations reserves (gold, currency of other nations, etc.). In most nations, the central bank is owned and operated by the government, but our Federal Reserve System is a so-called private corporation, but operates in secrecy and kow-tows to pressure from politicians. It was created by bankers to serve the interests of bankers and politicians, thus a scandal from its start. All developed nations today control their monetary systems tightly, including legal tender laws that give the governments a monopoly on creating money, and in various ways force people to use only the official government money (no gold, pesos, etc.). History and logic shows us that using a commodity such as gold as private money (issued by non-government mints) and banking always works well, where anyone can create money and run a bank, and the only government role is to prevent fraud and theft. The crooks that create and push (as in dope pushers) fake money are soon discovered and no one will use their money or bank. However, when the government is the crook, and uses legal tender laws to force use of their fake money, it is harder for the citizens to make corrections! Politicians always try...
