Prescription for a Successful Economy: The Standard Economic Model maps out a proven framework for socioeconomic progress that will enable any country to generate sufficient buying power for alleviating poverty, hunger, treatable diseases, and environmental degradation. Author Luther Tweeten bases his prescription for both rich and poor countries on what works and not on ideology. He notes that chronic general poverty and hunger are not the products of meager world resources or greedy corporations, but of dysfunctional policies, institutions, and cultures. He carefully defines and explains the standard model, shows gains available from reforming international trade and aid policy, recognizes the pivotal role of agriculture in development, and outlines the promise and pitfalls of coping with falling world population that will attend economic progress.
